The Homeless Resource Network (Network), a 501(c)3 non-profit, partners with the community to provide solutions to homelessness. The Network assists people experiencing homelessness with local transportation and identification needs. The Network also provides financial assistance to prevent eviction and/or utility disconnection and operates a housing program for HIV+ individuals. The Network produces the "Street Beat" a pocket-sized guide to emergency services. In addition, the Network is the lead agency bringing together all agencies and churches that serve people experiencing homelessness through a monthly homeless coalition meeting; because we know one agency alone cannot end homelessness.
